

## Paper Rocket Instructions Sheet (2-5)

<p>1. Fold the sheet of paper in half and then open it out again. (Creating a crease in the paper.)</p>	
<p>2. Fold the two top corners in to the center line.</p>	
<p>3. Fold the top large triangle over so that the two flaps in step 2 are underneath the large triangle.</p>	
<p>4. Fold the new top corners into the center line again.</p>	
<p>5. Fold the small triangle (outlined in blue) up over the two flaps.</p>	
<p>6. Fold along the center line so that the small triangle is on the underside of the plane on the outside.</p>	
<p>7. Fold the outside wings down so that the top of the wing touches the bottom of the rocket (see picture: fold so the orange lines touch). Do this on both sides.</p>	
<p>8. Open the wings back up to make the rocket easy to hold and ready to fly.</p>
